

UNPLUG

- 🔌 Turn off lights when you're not in the room and unplug appliances when you're not using them
- 🔌 It only takes a second to be environmentally conscious
- 🔌 Plug in computers to a power surge strip that you can switch off when they're not in use
- 🔌 The average U.S. household spends \$100 per year to power devices while they are off (or in standby mode)
- 🔌 On a national basis, standby power accounts for more than 100 billion kilowatt hours of annual U.S. electricity consumption and more than \$10 billion in annual energy costs
